PROJECTS

Sahaaya | RIT

- This is a Flutter Application that serves as a platform for people to report the problems they face in their neighborhood to the concerned government organization.
- This was developed as a mini project in semester 6.
- <https://github.com/bhushangy/Sahaaya/blob/apk/app-release.apk>.

Depression Detector | RIT

- Depression Analyzer is a web application that analyses people's sentiment through speech and helps in identifying early straits of depression.
- This was developed as a mini project as a part of the Natural Language Processing Course at RIT in semester 5.
- <https://github.com/bhushangy/Depression-Detector>

YelpCamp | Freelance

- This is a multi-faceted Web Application that is built using Node-Express framework.
